

ADRENO-LYPH PLUS

Ingredients: High Potency Adrenal with synergistic support. Each Tablet Supplies: 235 mg of tissue concentrate from bovine source (not extracts) as Adrenal 221mg, Pituitary 12mg, Parotid 2mg, Vitamin C 175mg, Bioflavonoid Complex 45mg, Pantothenic Acid (D-Calcium Pantothenate) 70mg, DL-Methionine 60mg, Choline Bitartrate 60mg, Vitamin B-1 15mg, Vitamin B-2 15mg, Vitamin B-6 15mg, Niacinamide 50mg, Magnesium 100mg.

Supportive Function: High-quality, concentrated adrenal glandular support is boosted by pituitary and parotid glandulars, along with the vitamins, minerals and amino acids that synergistically contribute to the healthy maintenance of these tissues.

When is adrenal support effective? Stress and conditions caused by stress, fatigue, lethargy, weakness, mental fuzziness, irritability, and inability to handle everyday tasks. May also be beneficial in hypotension problems.

Clinical Applications/Research: Glandulars are thought to provide precursor substances that the body can use to support and enhance the function of a specific gland. They may provide the potential “life force” the body needs to enhance function of a specific organ or gland.

Vitamin C is sometimes called “the anti-stress” vitamin. There is more vitamin C in the adrenal gland than any other tissue in the body. Studies have shown that rats exposed to the stress of radiation die unless a major drop in serum vitamin C is prevented. When the drop in vitamin C is prevented, the stress of radiation is handled until the body returns to homeostasis.

B vitamins, especially B-2, B-6, niacinamide and pantothenic acid are energy-producing vitamins and serve as precursors for vital energy/anti-stress glands, such as adrenals and thyroid.

Pantothenic acid: Vitamin B-5, or pantothenic acid, functions as part of the molecule called Co-enzyme A or CoA. It is vital for optimal adrenal activity (including increasing production of cortisone and other adrenal hormones), important for healthy skin and nerves, and supports the synthesis of acetylcholine (a neurotransmitter), fatty acids, cholesterol, steroids, and phospholipids. It is known as one of the main anti-stress vitamins and can be made by the bacterial flora in the intestines.

Magnesium is a cofactor for many enzymes, including those in energy metabolism. Magnesium is known for its relaxation qualities.

Testimonials/Nutrient Tidbits: Low back pain: A doctor told me this story . . . “My pastor had a ten year history of severe low back weakness and problems. Although he was under regular spinal care, he still could not stand for longer than ½ hour without pain. My exam revealed weak adrenals. I placed him on Adreno-Lyph Plus and within two weeks he could stand without pain. This is a typical story about the results I see with Adreno-Lyph Plus.”

Knee problems: Adrenal glandular support produces great results in cases of chronic knee pain. Another product, Sago-C 500, may be beneficial in chronic knee pain, elbow pain, etc. if an infection is involved.

Levels of Adrenal support: One doctor pointed out . . . For acute adrenal problems I use DSF Formula, for chronic adrenal problems I use Adreno-Lyph Plus, for minor adrenal problems I use the tincture Adreno Plus and for very minor problems and children I use Energizer Forte (Terry Hambrick, D.C.).

Bacterial Problems: A doctor reports . . . Immuno Plus in combination with Adreno Plus or Adreno-Lyph Plus works well for bacterial problems (Stephen Ediss, D.C.).

Suggested Dosage: 1 tablet 2 times daily

Size: 60 or 120 tablets

Vegetarian: No

Contraindications: Do not take during pregnancy. Pituitary glandular is contraindicated in cancer. High dosages of vitamin C (>1000 mg.) should not be taken by gout patients or by kidney stone formers. Vitamin C is contraindicated in iron overload disease.
